

Dear LSC Campus Community:

Welcome back and Happy New Year! We are already half-way through our first week of spring semester, and the energy is wonderful. I love seeing students, staff, and faculty busy with activities, classes, social events, studying and just generally being together. We have big plans for the coming months and have already made some changes. I know there are some questions out there, so let me address those that seem to be of most interest:

Food Service

As you know, we are selling grab and go items out of our bookstore. We do plan to take over the café space in the main corridor and re-open our own food service later this semester. We will still have grab and go, as well as select hot items, so watch that space.

Library, TRIO, Tutoring, IT Helpdesk

Big plans are underway to do some remodeling of our library to bring more student services together. That project will get underway sometime this summer.

Moving Downtown Center to Main Campus

The building that houses our Downtown Center was sold and we need to move out of that space when our lease is up. We are in the process of designing and building a new space on the main campus to house our Manufacturing, Welding, CNC, and CAD programs on the main campus at the T Building. We hope to have that project along with our roofing project underway this summer.

Calendar of Events

Last semester we created a calendar of campus events. You will find a link on the home page: <https://www.lsc.edu/> scroll down below the NEWS and click on the [LSC Master Calendar](#) Link. Employees will also find a link in the employee portal.

Have a wonderful extended weekend (we celebrate MLK Day on Monday, and the buildings will be closed). **Be sure to check the [LSC Master Calendar](#) for all campus events!**

Be well, stay safe.

Patricia L. Rogers, Ph.D.
